SKILLS

React, Redux, Ruby, Rails, JavaScript, HTML5, CSS, SQL, SCSS, JQuery, Git, Heroku, Webpack, PostgreSQL, SQLite3, Express.js, Node.js, MongoDB, d3.js, Google Maps API, Amazon Web Services (AWS)

PROJECTS

CheckRev (Rails, ReactJS, PostgreSQL)

[live](#) | [github](#)

A Yelp inspired full-stack application with a RESTful Rails API Backend connecting to a React/Redux frontend built with Ruby, JavaScript, and SCSS.

- Implemented CRUD functionality securing user credentials using the BCrypt Library to hash and salt the password, and allow users to securely post, edit, and delete reviews on businesses.
- Integrated the Google Maps API to allow users to search for businesses based on location, category, or type, and incorporated a user friendly and intuitive design that allows users to search for businesses by location and category.
- Incorporated AWS image upload to allow users to attach photos to their reviews, allowing for a more engaging user experience and ease of scalability by avoiding storing images in the database.

Take A Hike (MongoDB, Express.js, ReactJS, Node.js)

[live](#) | [github](#)

Contributed to a 4 person team to build a full stack application using JavaScript and SCSS.

- Collaborated as the 'flex' engineer of the team, contributing to the front and backend integration allowing relevant data to reach frontend components efficiently by producing solutions that optimized time complexity, making for a faster application and a better user experience. Instituted an integration between the Google Maps API and the Hiking Project which allows users to search for hiking trails throughout the United States, view information on each trail like difficulty and distance.
- Established CRUD functionality with a *reviews* and *lists* feature which allows a user to review individual trails, and plan their hikes, respectively. Users are able to customize the style of their input thanks to the Rich Text Editor feature.

What If Calculator (JavaScript, d3.js)

[live](#) | [github](#)

Users can project their future savings based on changes to their habits, interest rate, and time period.

- Launched a single page application using d3.js to create an engaging data visualization which shows long term and short term savings based on user inputs.
- Built a custom algorithm for accurate calculation of interest and accrual based on variables provided by the user.

EXPERIENCE

Rustic Pathways - Southeast Asia & U.S.A.

Southeast Asia Groups Manager

Sept 2018 - March 2020

- Managed a team of 30+ staff which facilitated programs throughout the region. Ensured the safety of thousands of students, and managed logistics and scheduling to establish a smooth program experience for leaders and a transformative experience for students.
- Cultivated relationships with current and prospective clients by planning and executing custom scouting programs.
- Trained new hires in topics including student safety, customer service, cultural awareness and understanding, and discussion and activity planning.
- Restructured the onboarding and training process for part-time staff which served as a model for a new Global workflow.

Outside Sales Coordinator

Sept 2016 - Sept 2018

- Sought new partnerships with potential clients throughout Southeast Asia while maintaining relationships with current clients and upselling programs to increase sales and profitability.
- Traveled weekly/bi-weekly to a new country, booked meetings with prospective customers, organized student events and presentations, and attended conferences to increase sales and presence of the organization in the Southeast Asia Region.

Program Leader

June 2015 - Sept 2016

- Guided students on experiential education programs throughout Southeast Asia. Provided a stellar learning experience with creative activities and discussion, as well as providing historical and cultural context to deepen the understanding and experience of each individual student.

Hi-Value Education - Thailand

English as a Second Language (ESL) Teacher

Oct 2013 - Feb 2015

- Planned curriculum featuring creative activities and assignments to engage students in conversation and practice grammar.
- Collaborated cross culturally with colleagues and administration to create a captivating learning environment.
- Organized extra-curricular activities to foster a sense of community with the students and promote soft-skills and teamwork.

EDUCATION

Web Development - App Academy | Summer 2020

BS Marketing - Providence College | 2008 - 2012

ACCOMPLISHMENTS

Thai Language Fluency
